# & Family Maths 3

Word building: family Phrasal verbs

Collocations: relationships | Relations

It doesn't matter if your family is big or small; some numbers are the same for all of us. For every person on the planet there are people who are their biological parents. That means you have four biological grandparents and <sup>2</sup> great-grandparents.

The diagram shows one person's parents and their parents' parents over <sup>3</sup> generations. You can see that one person has great-great grandparents.

It's interesting to think of all their different experiences. How did they meet? Did they all grow up in the same place or did some of them move away?

This diagram doesn't tell the whole story. There might be many brothers and sisters in each family, or even step-parents and half-brothers and half-sisters. Also, you can't see all the aunts, uncles and cousins on this diagram. Most people have many first, second and third cousins. Even if you're in a city with <sup>5</sup> of people, it's possible that you have relations there. So be kind to those loud neighbours of yours – they might be your cousins!

### **Reading and Vocabulary**

### **Five steps to friendship**

If you wanted a new friend, what would you do? It's not as simple as you might think. We usually find friends in the places where we live, study, work or relax. So our classmates and teammates can easily become friends, but how?

- **1** The first step normally happens when one person shares some information. This could be anything from a comment about a funny TV show to food that you can't stand. Or you could tell someone about your likes and dislikes, for example.
- Ζ That's a great start. You aren't strangers, but you aren't best friends yet. Next, we need the other person to reply with similar thoughts about that TV show or another horrible food. From here, it's easier to have more conversations about other things. When two people have talked about their thoughts and opinions, they're starting to make friends.
- 3 The third step involves being a good friend. To take this step, you need to listen to your friend and help them. Over time, you can share problems and talk about lots of things. You know the other person is always ready to listen and support you. That's a really good friendship.
- The fourth step is about looking for friends who support our social identity. What does that mean? If dancing or basketball is really important in your life, then you will probably want friends who see you as a good dancer or a basketball player. That's why we choose friends who are like a mirror. They show us a picture of how we want to be.
- 5 Finally, remember to stay in touch with your friends. A good way to do this is to make time to see your friends or to phone them and send messages when you're not in the same place. It's important to remember that friendship needs work!

1 What makes a friend a true friend?

7.7

2 Read the text. What do we find out about each friend in Flavia's story? Who are your real friends?

Last week I learned an interesting lesson about true friends. I was feeling stressed about my Science homework. I didn't understand it and I needed someone to explain it. First, I asked my best friend Sienna to help. 'I'd explain it if I was free, but I'm quite busy.' Sienna and I get on well, and

- she's good at Science, so I was disappointed.
- Next, I went to another friend who is also my neighbour. 'If I understood the homework, I'd help you,' said Harry, 'but it's too difficult.' Then I felt really stressed!
- Just then a new classmate heard us. Lara is popular, but we don't speak often because she's guite loud and I'm a bit shy. I was surprised by her next words. 'I can help,' she offered.
- Lara explained the Science homework to me carefully. Afterwards, we sat and chatted. We discovered we have a lot in common and the same sense of humour. It's been a great way to make a new friend!

### Lessons from Grandad

Have you ever thought about what you get and learn from your elders? Take food, for example. Where does your food really come from? For example, think about modern milk production. Milk goes from a farm to a milk factory, where it is processed and put in milk bottles or cartons. Then someone buys it for you from a supermarket or a local shop. That's a lot of steps!

Mark Holland, from Surrey, didn't like the large number of steps involved in producing food. 'It seemed that the food was not as fresh as we thought. So, I decided to go to a farmer's market one day. My grandfather sells food from his farm there. The food is a little more expensive, but it is organic. This means it is more nutritious and there are no added chemicals in the food. It is much more delicious too. I spend a lot of time on my grandfather's farm. He shows me traditional methods of farming and cooking. Next year I want to study farming. I think with my grandfather's help and my studies, I can become a very successful farmer.'

Sarah became interested in organic food a few years ago. She enjoys hanging out with Grandad. 'One year he taught me how to make a vegetable salad. All the vegetables were from his garden. The salad was delicious - very different from the ones from supermarkets. This made me think about where our food comes from and how fresh it is. Now I'm a teenager I still visit Grandad and he teaches me so many things about food, like how to cook it and where it comes from. When I finish school, I want to become a chef and cook with food straight from my own market garden.'
